

Fahridana Ahmad Rayyansyah

Malang, Indonesia | fahridanaaa@gmail.com | fahridanaa.my.id | in/fahridana-ahmad-rayyansyah | github/Fahridanaa

SUMMARY

Software engineer building scalable web and mobile applications. Focused on clean architecture, performance optimization, and production-ready systems.

EXPERIENCE

PT. Multi Spunindo Jaya · Intern

Sidoarjo, Indonesia (Onsite)

Management Information System Intern

Jul 2025 – Dec 2025

- Built a Performance Appraisal system in Laravel 12 with dynamic routing, period observers, and cascading data generation for quarterly employee evaluations.
- Implemented bulk Excel import/export, reducing evaluation data entry from 3 days to 2 hours per cycle.
- Gathered requirements and iterated features through weekly sprint reviews with internal stakeholders.

Stack: Laravel 12, PHP, MySQL

80&Company · Contract

Japan (Remote)

Full-stack Developer

Feb 2025 – Jul 2025

- Built UI features in Next.js 14, React 18, and TypeScript with WCAG accessibility standards and cross-browser consistency.
- Integrated OpenAI API for automated video summarization and keyword extraction, reducing manual processing overhead by 40%.
- Contributed to a shared Radix UI component library with Storybook and Jest, ensuring visual consistency across the product.

Stack: Next.js, React, TypeScript, OpenAI API, Firebase, GCP, Radix UI, Storybook, Jest

EDUCATION

Politeknik Negeri Malang

Malang, Indonesia

Bachelor of Informatics Engineering

2022 – 2026

- GPA: 3.81/4.00

PROJECTS

Cache Strategy Benchmarking — Moodle-Inspired LMS

Full-stack Developer

Feb 2026 – Jul 2026

- Built a Moodle-inspired LMS benchmark in Laravel 12 comparing Cache-Aside, Read-Through, and Write-Through strategies using Redis 7.
- Validated architectural decisions by executing a k6 benchmarking suite simulating up to 2,000 concurrent users and analyzing P99 latency.

HRIS — Human Resource Information System

Full-stack Developer

Apr 2025 – Jun 2025

- Engineered a multi-tenant HRIS with Clean Architecture in Go and Next.js, integrating Midtrans payment gateways for subscription billing.
- Developed a geofencing attendance system with real-time mapping via TanStack Query and Supabase Auth, containerized with Docker and deployed via CI/CD to Azure.

Leafolyze — Leaf Tomato Disease Analyzer

Mobile Developer

Oct 2024 – Dec 2024

- Built a cross-platform Flutter app using the BLoC pattern with on-device TensorFlow Lite inference for offline tomato disease detection.
- Integrated a marketplace and RESTful data layer using the Repository pattern and Dio for seamless authentication and content sync.

SKILLS

Languages: TypeScript, PHP, Dart, Go, JavaScript
Frameworks: Next.js, React, Laravel, Flutter, Hono, HTMX + Alpine.js
Infrastructure: Docker, Redis, Git, GitHub Actions, Azure, PostgreSQL
Testing & Quality: Jest, Storybook, k6
Other: Power BI, Figma, REST API Design, Agile/Scrum
