SUMMARY

Frontend-focused full-stack developer. Carried most of the frontend on a five-person Next.js build, and wrote 549 of its 965 commits, including the table, form and map components the record screens reuse.

EXPERIENCE

PT. Multi Spunindo Jaya Sidoarjo, Indonesia
Management Information System Intern Jul 2025 – Dec 2025

- Built the appraisal period screens, dashboards and Excel/PDF export, then trained the admins who run the cycle.
- Rewrote the Performance Appraisal system from native PHP to Laravel 12 on MySQL for 200+ employees.
- Replaced a manual 2 to 3 day quarterly entry step with an HRIS sync and bulk Excel import, saving 8 to 12 working days a year.

80&Company Japan (Remote)
Full-stack Developer Feb 2025 – Jul 2025

- Shipped the interface for an AI video summarisation and content tool in Next.js and TypeScript.
- Put the shared Radix components under Storybook with Jest tests, so a change to a primitive was verified before it reached a page.

EDUCATION

Politeknik Negeri Malang Malang, Indonesia
Bachelor of Informatics Engineering · GPA 3.81 / 4.00 2022 – 2026

PROJECTS

HRIS, Human Resource Information System
Full-stack Developer Apr 2025 – Jun 2025

- Built the record screens for employees, leave, overtime and documents in Next.js, with TanStack Table grids and react-hook-form against a Go and PostgreSQL API.
- Built the Leaflet map of attendance geofences and the Chart.js dashboards.
- Built the frontend image in Docker and deployed it to Azure Container Apps from GitHub Actions.

Portfolio, fahridanaa.my.id
Independent project 2024 – Present

- Built the site in Astro 7 with React islands and Tailwind 4, under a strict Content Security Policy with hashed inline styles and no third-party scripts.
- Generated a preview image per post with satori at build time, so a shared link renders a card without a runtime service.

Ideas Browser
Frontend assessment Sep 2026

- Built an ideas browser in React 19 and React Router 8 with React Compiler, TanStack Query and Tailwind 4.
- Kept page, size, sort and search in the URL, restored scroll on back, and loaded the detail query before navigating, so a back press lands on the same list.
- Ran Playwright with axe-core on every page, and recorded the one accepted brand contrast pair, so any other violation fails the suite.

SKILLS

Frontend: Next.js, React, Radix, TanStack Query, TanStack Table, Storybook, Tailwind

Languages: TypeScript, PHP

Backend: Laravel, PostgreSQL, MySQL

Infrastructure: Docker, Azure

Testing: Jest, Playwright, axe-core
