SUMMARY

Software engineer with 1 year of experience building web and mobile applications in TypeScript, PHP, Go, and Dart.

EXPERIENCE

PT. Multi Spunindo Jaya · Intern Sidoarjo, Indonesia (Onsite)

Management Information System Intern Jul 2025 – Dec 2025

- Migrated the Performance Appraisal system from native PHP to Laravel 12 for 200+ employees; it runs on the company's internal network.
- Replaced manual entry that took an estimated 2–3 days per evaluation period with HRIS database-view sync and bulk Excel import of scoring standards.
- Built evaluation periods with deadlines and locking, admin and evaluator dashboards, and Excel/PDF report export.
- Gathered requirements from HR and supervisors, and trained admin users on the new system.

Stack: Laravel 12, PHP, MySQL

80&Company · Contract Japan (Remote)

Full-stack Developer Feb 2025 – Jul 2025

- Built UI features in Next.js, React, and TypeScript.
- Built a video summarization feature: the app follows a YouTube channel by ID, reads new videos' auto-captions, and uses the OpenAI API to generate a summary and keywords.
- Built components for the shared Radix UI library, with Storybook documentation and Jest tests.

Stack: Next.js, React, TypeScript

EDUCATION

Politeknik Negeri Malang Malang, Indonesia

Bachelor of Informatics Engineering 2022 – 2026

- GPA: 3.81/4.00

PROJECTS

Cache Strategy Benchmarking — Moodle-Inspired LMS

Full-stack Developer Feb 2026 – Jul 2026

- Thesis project: a Moodle-inspired LMS in Laravel 12 that compares Cache-Aside, Read-Through, and Write-Through caching with Redis 7.
- Ran k6 load tests with up to 2,000 concurrent users and compared P99 latency for each strategy.

HRIS — Human Resource Information System

Full-stack Developer Apr 2025 – Jun 2025

- Built a multi-tenant HRIS with a Go backend and a Next.js frontend, including Midtrans subscription billing.
- Built a geofencing attendance system with live maps (TanStack Query, Supabase Auth), packaged with Docker and deployed to Azure.

Leafolyze — Leaf Tomato Disease Analyzer

Mobile Developer Oct 2024 – Dec 2024

- Built a Flutter app with the BLoC pattern that detects tomato leaf disease on-device with TensorFlow Lite.
- Added a marketplace and a REST API layer with Dio and the repository pattern.

SKILLS

Languages: TypeScript, PHP, Dart, Go, JavaScript
Frameworks: Next.js, React, Laravel, Flutter
Infrastructure: Docker, Redis, Git, GitHub Actions, Azure, PostgreSQL
Testing & Quality: Jest, Storybook, k6
Other: Figma, REST API Design
